AFI is in more places and in more cars on the road than you would ever imagine.

What is the Function of an Adhesive Film in a Car?

Adhesive films are used for bonding decorative trim and kick panels to door panel cover stock. The cover stock is usually PVC, PP, or TPO. The decorative trim is usually polyester fabric; the kick panels may be carpet with acrylic or latex coating.

What is the Function of an Adhesive Film in a Car? —cont'd.

Adhesive Films, Inc. supplies adhesives for bonding *heel pads* (PVC or TPO) to carpet fibers (nylon, PES or PP). Heel pads and carpet are dissimilar surfaces which are difficult to bond using any other adhesive.

Adhesive Films, Inc. offers adhesives for *bonding foam* (seat cushion) to fabric or foam backed fabric. Adhesive selection is driven by price, softness, breathability and heat resistance. Some seat constructions include a layer of resilient wadding for added support.

Adhesive Films are used for bonding *sunshade panels* for *sun-roofs*.

Adhesive Films, Inc. supplies adhesives and seam sealing tapes for the *waterproofing of seams* in a *convertible top*.

Adhesive Films, Inc. provides superior heat activated and pressure sensitive adhesives for thousands of uses, in a wide variety of industries.

Adhesive Films, Inc. is a solvent free manufacturer preserving the environment we have, while providing products for the most extreme ones.
