

Nylon Adhesive Films (NAF Series) Review of the Properties & Recommended Applications

AFI nylon adhesive films are typically used to bond fabrics (including some nylon fabrics) and embroidered emblems.

They are also used where resistance to temperature, oil and water is a requirement.

The most common uses for our nylon adhesive films are:

- ♦ **Apparel & Textile**—heat or RF adhesion to fabrics and resistance to laundry.
- ♦ **Automotive**—temperature & fuel / oil resistance.
- ♦ **Seam Tape**—waterproofing stitched seams in performance outerwear and footwear

The **NAF Series** is available:

- ⇒ In roll form on release paper,
- ⇒ Without release paper (“stripped”), or
- ⇒ Laminated to fabric, film or foil.

Ask Dr. AFI

Looking for a solution?

Have a quality issue?

Need a better bond?

Must have improved product durability?

What's **your** dilemma?

Submit it to us at:
